

Picopure 2 & Picotech 2

Picopure 2

This point-of-use system polishes purified water to remove microorganisms, pyrogens and organics from water. Used with the Hydro Picosystems, Picopure provides the highest quality water right at the sink. Suitable for HPLC, PCR and other critical applications, water is free of virtually any contaminants.

Available in recirculating and single-pass models, the Picopure is a unique product designed for the ultimate in purity.

High intensity ultraviolet light contained in a compact cabinet provides sterile water right at the sink. The Picopure 2 combines ultraviolet sterilization with ultra filtration to provide sterile, pyrogen-free water on demand. Add the UV Plus Pump for trace level organics and RNase removal (RNase free up to 20 hours) for the highest level of purity.

<0.1 CFU/mL
<0.25 EU/mL pyrogen

Specifications for Picopure 2 & Picotech 2

- Dimensions: 6.5" wide, 5" deep, 12" high
- Detachable 316 stainless steel outlet (for cleaning)
- 316 stainless steel needle valve

Picotech 2

This compact system sterilizes purified water continuously, eliminating the need for any added steps. Available on demand and right at the sink, Picotech's high intensity UV unit is conveniently cabinet-mounted. (Recirculating and single pass models available.)

<0.1 CFU/mL
